Document History

Version	Brief description of change	Date	Responsible
V01.00.00	Initial version	<2011-05-10>	RNE/K2L
V01.01.00	Firmware Generation 4.3.x	<2012-12-18>	RNE/K2L

1 LED blinking code of the MOCCA device

1.1 ABI firmware LED assignment

General hint: Green is always a sign that the BUS is in normal state. Red is always an Error.

1.1.1 MOCCA compact 2.x

The active color is blinking green. In case of a bus activity the corresponding led is switched off for a short time.

1.1.2 MOCCA compact 3.x

The active color is blinking blue. In case of a bus activity the corresponding led flashes white for a short time.

1.1.3 Overview

Name of LED	Color	Function
Active	Green MOCCA compact 2.x	Firmware alive: ABI Firmware: LED Active is toggling 3 times than a short break. Flashing mode: LED Active is toggling very fast without any break.
Active	Blue MOCCA compact 3.x	Firmware alive: ABI Firmware: LED Active is toggling 3 times than a short break. Flashing mode: LED Active is toggling very fast without any break.
