

PURPOSE

Empowering innovation which enhances the human experience by delivering smart, connected and secure technology solutions.

VISION

Be the Very Best Embedded Control and Processing Solutions Company Ever.

MISSION STATEMENT

Microchip Technology is a leading supplier of total system solutions – devices, software and services – delivering a broad spectrum of innovative standard and specialized mixed signal microcontrollers; FPGA products; analog, power, timing and security products; connectivity products; related non-volatile memory products and Flash-IP solutions.

In order to contribute to the ongoing success of customers, employees, shareholders and the communities in which we operate, our mission is to focus resources on high value total system solutions aligned with fast growing market megatrends, and to continuously improve all aspects of our business, providing an industry leading return on investment.

GUIDING VALUES

Quality Comes First

We are on a relentless quest for perfection and are committed to the goal of zero defects. We will perform correctly the first time and maintain our company's quality management system certifications to ensure customer satisfaction. We employ the aggregate system so that all employees anticipate problems and implement root cause solutions using effective and standardized improvement methods. We believe that quality is built-in, and not inspected in; and that when quality comes first, reduced costs follow.

Customers Are Our Focus

We establish successful customer partnerships by exceeding customer expectations for products, services and attitude, while ensuring that our intellectual property is protected as we exchange information and share knowledge. We start by understanding our customer's needs, earning our credibility by producing quality products, delivering comprehensive total systems solutions and meeting commitments. We believe each employee must effectively serve their internal customers in order for Microchip's external customers to be properly served.

Continuous Improvement Is Essential

We utilize the concept of "Vital Few" to establish our priorities. We concentrate our resources on continuously improving Vital Few while empowering each employee to make continuous improvements in their area of responsibility. We strive for constructive and honest self-criticism to identify improvement opportunities.

Employees Are Our Greatest Strength

We design jobs and provide opportunities promoting employee teamwork, productivity, creativity, pride in work, trust, integrity, fairness, involvement, development and empowerment. We base recognition, advancement and compensation on an employee's achievement of excellence in company, team and individual performance. We provide for employee health and welfare by offering competitive and comprehensive employee benefits.

Products and Technology Are Our Foundation

We make ongoing investments and advancements in the design and development of our manufacturing processes, device, circuit, system and software technologies and services. We value and protect intellectual properties that allow us to develop timely, innovative, reliable and cost effective total system solutions that give our customers the freedom to innovate for today and tomorrow.

Total Cycle Times Are Optimized

We focus resources to optimize cycle times to our internal and external customers by empowering employees to achieve efficient cycle times in their area of responsibility. We believe that cycle time reduction is achieved by streamlining processes through the systematic removal of barriers to productivity.

Safety and Security Are Never Compromised

We place our concern for the health, safety, and security of our employees, company, property, personal data, and community at the forefront of our decisions, policies and actions. We are all individually and collectively responsible for safety and security.

Profits and Growth Provide For Everything We Do

We strive to generate and maintain industry leading rates of company profits and growth as they allow continued investment in the future, enhanced employee opportunity, and represent the overall success of Microchip.

Communication Is Vital

We encourage appropriate, honest, constructive and timely communication in company, customer, investor, government and community relationships to resolve issues, exchange information and share knowledge.

Suppliers, Representatives And Distributors Are Our Partners

We strive to maintain professional and mutually beneficial partnerships with those suppliers, representatives, distributors, design houses and consultants who are an integral link in the achievement of our mission and guiding values.

Professional Ethics and Social Responsibility Are Practiced

We manage our business and treat customers, employees, shareholders, investors, suppliers, channel partners, community and government in a manner that exemplifies our honesty, ethics and integrity. We honor our short- and long-term fiscal, social and environmental responsibilities and are proud to serve as an equal opportunity employer.
